

CASE STUDY

FREEDOM STORM MINERAL AND BOULDER

A private school in Alloa undertook a large project to install a state-of-the-art learning facility designed to enhance Self Directed Learning.

The redesign featured soundproof pods, brainstorming rooms, virtual classroom equipment and more, meaning a high quality finish was paramount. In a neutral yet stylish design, FREEDOM STORM tiles were selected. Its “heavyweave™” tufting process means it is structured to retain its outstanding appearance for years to come, even in the high traffic environment of a school, due to its superior tuft density and stain resistant Antron^(R) yarn.

The FREEDOM STORM range goes beyond simply providing durability, the subtlety of this pattern gives the floor an air of luxury. It is therefore no surprise STORM is our most popular designs in the FREEDOM COLLECTION - a collection inspired by both nature and the urban environment. The colours Mineral and Boulder were particularly effective at providing a classy floor suited to a modern and successful private school.
