

CASE STUDY

HEXXTILE, FREEDOM AND AXIS

In this office renovation, Duraflor was delighted to work with this forward thinking construction company in delivering an ambitious design scheme, which is used both as their own working environment and also a showroom for their clients, demonstrating their ability to create inspiring workplaces.

The design concept puts together a wide range of different products from Duraflor. First and foremost is one of Duraflor's premium carpet tile ranges, Freedom Storm, in colours Mineral and Boulder. This designer tile will retain its striking appearance in these offices for many years, due to its heavyweave construction, with a high tuft density and exceptional yarn properties. This blends into areas using hexagon carpet tiles from our Hexxtile Progression range in a mix of patterns and colours.

Into these carpet tiles a vinyl tile has been fitted into the hexagon shape which provides a defined area for the kitchen. This area features the Axis looselay tiles in Concrete Light Grey which are 5mm thick and are therefore the same level as the carpet tiles.

Finally, a highlight tile from our Hexxtile Bright Ideas range introduces a splash of colour and has also been used to define the border around the boardroom table.
