ICE FORMATION

heavy duty carpet tiles

DURAFLOR

ICE FORMATION 4915 Dark Nilas and 4922 Black Shards

FRACTURED ICE is powerful yet subtle - matching the intricate designs you see as pressure builds on sheet ice.

A heavyduty tile with a light-touch, natural organic geometry. It creates a natural flow as you make your way through a room.

The range has great sustainability credentials, coming with a 20 year commercial wear guarantee. The colours have been carefully selected, so that each is infinitely popular.

4915 FRACTURED ICE Dark Nilas

4910 FRACTURED ICE Grey Drift

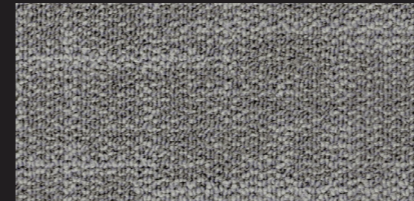

5916 ICE FORMATION Polar Grey

ICE FORMATION perfectly reflects glacial striations, which are formed when stones and boulders, that were frozen in the base of inland ice, abrade the surface of the bedrock. In the same way as striations show the direction of the ice, this range subtle guides you through the room.

Sharing the same popular colour bank as Fractured Ice and the same sustainability credentials. Both ranges boast a high tuft density and are made with 100% solution dyed nylon, ensuring their good looks won't melt away.
